Science: Chapter 5 Review

Test Date: \_\_\_\_\_

## Chapter 5 Our Dynamic Earth

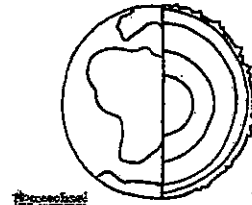

Use all the resources you have in your binder and your textbook to fill in all the answers on the review sheet. We will go over the answers in class. Be sure to study.

### Lesson One: Earth's Landforms

Review: Each layer of the Earth has its own features.

The \_\_\_\_\_ includes all the gases around Earth.

\_\_\_\_\_ is the deepest layer of Earth that is made of solid metals.

The \_\_\_\_\_ layer is just below the crust.

\_\_\_\_\_ is the outermost part of Earth and is a thin layer of solid rock.

Earth's outer core is made of \_\_\_\_\_.

\_\_\_\_\_ are physical features on Earth's surface. (Examples are plateaus, valleys, canyons and mountains)

### Lesson Two: Plate Tectonics

Review: Earth's surface is made of plates that constantly move.

A \_\_\_\_\_ is a scientist that examines rocks to learn about Earth's history.

\_\_\_\_\_ was the supercontinent that contained all the continents we know today.

\_\_\_\_\_ is the theory scientists have developed to explain how forces underground cause the continents to move.
